PROFESSIONAL SUMMARY

Software engineer with skills in building and deploying data web and mobile applications across health tech, education, business management, and data driven systems.

CORE SKILLS:

- Software Development: JavaScript, Python, PHP, HTML/CSS
- Frameworks & Libraries: React, Node.js, Django, Flask, Laravel
- Databases & Tools: MySQL, PostgreSQL, Git, Salesforce, Stripe integration
- Cloud & Deployment: Google Cloud Platform, Android (Google Play), iOS (App Store), Firebase
- Product & UX: Figma, Wireframes, Prototypes
- Data & Analytics: Pandas, NumPy, Scikit-learn, Plotly, Streamlit, Folium, Geopy, OpenStreetMap APIs

PROJECTS

- **Health Tech Patient Management Platform**
  Developed frontend functionality for a web-based patient and hospital management system supporting electronic health records and medical insurance claims.

- **Learning Management System**. An edutainment platform for children with learning disabilities. **Tech Stack**: Python, Django, React, Node.js.

- **Traffic Analytics & Route Optimization Platform**. A web-based traffic monitoring platform designed to avoid congestion and optimize routes using real time data analysis and machine learning predictions. **Tech Stack:** Python, Django, PostgreSQL, Scikit-learn, Folium, OpenStreetMap API.

- **POS Accounting System.** Developed a centralized solution for tracking and managing company inventory, account management, and financial planning tools. **Tech Stack:** PHP(Laravel), MySQL, JavaScript, HTML/CSS

EDUCATION & ADDITIONAL TRAINING

BSc (Hons) Computer Science, INES RUHENGERI

AI Career Essentials, ALX Africa - May to July 2024 (8-week course)

WORK EXPERIENCE

UI/UX Designer & Frontend Developer Intern, Plug and Play Foundation | Sunnyvale, CA, USA
February 2026 – May 2026

- Designed and implemented user interfaces for a health-tech platform, translating clinical workflows to intuitive web experiences.
- Collaborating with product and engineering teams to iterate on wireframes, prototypes, and production ready components using Figma and React.

Software development intern, Spiderbit Limited | Kigali, Rwanda
April 2025 – July 2025

- Assisted in developing and maintaining software applications. I helped to write, test, and improve code for web apps, ERP modules, or client platforms under guidance from senior developers.
- Troubleshot and debugged code.
- I joined sprint planning or review sessions to give updates, ask questions and learn agile development processes from senior staff.

App Deployment Specialist (remote) | Invisible Technologies | San Francisco CA 94104, USA | *November 2023 – January 2025*

- Configured and deployed 30+ mobile applications daily to Google Play Store and Apple App Store using Firebase, GCP, and Apple Developer tools.
- Integrated Stripe payment processing for 50+ iOS applications.
- Managed app signing keys, certificates, and security credentials across Android and iOS platforms.
